

Greener Driving

Handy hints to reduce your car fuel bills and reduce your CO₂ emissions

Nice wheels!

Check your tyre pressure regularly

What's in your boot?

Remove clutter to improve fuel efficiency

More haste, less speed and fuel

The most fuel efficient speed is typically 45 - 50mph

Share the ride

Consider car sharing to work

Look into the future

Drive smoothly and avoid sharp acceleration and braking

Don't wake up the neighbours

Drive away immediately when starting from cold

Save fuel

Walk, cycle or use public transport for shorter journeys

It's not so cool after all

Use air conditioning sparingly
